Теоретическая часть

Анализ и формулы для основной части были представленны в основной части работы. Здесь представлю лишь формулы для сборки матрицы и вектора правой части линеаризованной по методу Ньютона

Исследование

Ниже представлены таблицы с характеристиками сходимости количества узлов и количества итераций по нелинейности на всех временных слоях

Метод простой итерации

 $\lambda(u) = u^2 + 1 \simeq u(x,t) = 3x + t$

N	Nodes	Iteration	\$ u(x,t)^*- u(x,t) _ {L_2}\$	\$\log(\frac{ u(x,t)^* - u(x,t)_ {h} _ {L_2} }{ u(x,t)^* - u(x,t)_ {\frac{h}{2}} _ {L_2}})\$
